

avi safe

Vetafarm's Avi Safe disinfectant cleanser is non-irritant, non-toxic, non-staining and biodegradable. Avi Safe deals with all aspects of hygiene control and the combating of cross infection in animals. It is safe and suitable for use in both human and animal environments. Avi Safe is suitable for hospital cages, food and water containers, incubators, brooders, perches, nest boxes and general use. Hand rearing implements and other instruments may be left in Avi Safe solution.

Extensive skin tests have shown that Avi Safe caused no reddening of the skin or irritation to users. Avi Safe therefore offers its users a safe alternative to potentially hazardous and irritant products, whilst retaining its ability to destroy dangerous micro-organisms. Avi Safe has a pH of approximately 4 when neat and 5.5 to 6.0 at working solution. Avi Safe is a very stable product which has a two year shelf life undiluted and 12 months at working strength solution.

Avi Safe is non-selective and is effective against bacteria, viruses and fungi including:

BACTERIA
