

VETAFARM WEIGHTS & MEASURES CONVERSION CHARTS

The following charts provide an approximate conversion from metric to US Imperial measures for most of our product sizes.

LIQUID MEASURE	
1000mL	1L
128Fl.oz.(US)	1US gal
METRIC	IMPERIAL
30mL	1Fl.oz.(US)
100mL	3.3Fl.oz (US)
250mL	8.4Fl.oz.(US)
500mL	17Fl.oz.(US)
1L	33.8Fl.oz.(US)
5L	1.3US gal
25L	6.6US gal

DRY MEASURE	
1000g	1Kg
16oz	1lb
METRIC	IMPERIAL
25g	0.9oz
80g	2.8oz
90g	3.1oz
100g	3.5oz
130g	4.5oz
350g	12.3oz
450g	1lb
500g	1.1lb
750g	1.6lb
850g	1.8lb
900g	2lb
1Kg	2.2lb
1.3Kg	2.8lb
2Kg	4.4lb
2.5Kg	5.5lb
10Kg	22lb

Each bird should drink 6mL per 100 grams body weight.
Approximate water intake 0.2 (1/5) Fluid ounce (US) per 3.5 (3 1/2) oz bodyweight.

Please Note: The spoons enclosed with Vetafarm products are equal to the grams stated on the product label.

Spoons measure weight not volume.

No other measuring device should be used unless it has been calibrated with scales. Different products have different weight per volume eg. A spoon of lead is heavier than the same spoon of feathers.

Syringes:

All of our syringes are in mLs.
